DETAILED ACTION

Allowable Subject Matter

Claims 1-4, 11-14 allowed.

The following is an examiner's statement of reasons for allowance:

Barton (US 6,233,389) discloses a multi-channel recording device configured to record data on a disk shaped recording medium as seen in Figure 1. The recording means has the ability to alternately record object data that is obtained by the encoding means and which corresponds to the programs as further seen in Figure 2 and described in Column 4 Lines 23+. Additionally, Barton discloses a receiving means and a control means for the system as disclosed in Column 3 Lines 62+; however fails to disclose the recording data based on a CDA unit and recording management data.

Hirayama et al (US 5,630,006) discloses a multi-scene recording medium for reproducing various scenes chosen from the user. As described in Column 6 Lines 5-23 and further shown in Figure 12 and Column 11 Lines 1-44 the programs are ordered by starting times; however fails to disclose the recording management data for managing object data and reproduction time for controlling the order in which the first and seconds programs are reproduced.

Yasukohchi et al (US 6,278,837) discloses a multichannel recording and reproducing apparatus wherein two programs are received through video input as described in Column 3 Lines 32-49. The two streams are parallel processed for selecting of recording of the desired program. However, it can be seen the prior art of record fails to teach, disclose, or fairly suggest:

“..control means for recording the management data in the management area of the disk-shaped recording medium, wherein the management data controls the reproduction means to reproduce the first and second programs in an order determined by channel numbers or recording start times, wherein said specified data length unit is a CDA unit and the control means records reproduction management data in the management area of the disk-shaped recording medium, separate from the management data for managing the object date, and the reproduction management data controls the reproduction means to reproduce the first and second programs in an order determined by channel numbers or recording start times.”

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled “Comments on Statement of Reasons for Allowance.”
